

The latest news on what's powering our neighborhoods

PSE's Wind Facility reopens to the public

From April through October, you can get up close to wind turbines and solar panels at PSE's Wild Horse Wind and Solar Facility located about 16 miles east of Ellensburg. Visit the Renewable Energy Center, take a tour or use the property for recreation. See our web page for a list of spring events.

Don't take chances: Call before you dig

April is Safe Digging Month, a good time to remember to call 811 two business days before beginning any work that involves digging. PSE will have its underground natural gas and electric lines marked so you can avoid injury or damage from accidentally striking them. Washington state law requires all digging projects on private, public and commercial property to have utilities marked.

Call before you dig.**

You have our guarantee

We are committed to keeping scheduled appointments and to restoring power outages as soon as we can. If we don't keep an appointment or if electric service is out for 120 consecutive hours or longer, subject to certain conditions, we'll credit your account \$50.
